

No learning curve.
Easy to use.

No Server required

Stream Music and Films

The new way to manage, share & backup your files.

With **CHDCloud Backup** your files are automatically backed up as you work. No need to copy them or run a scheduled task.

If you have **CHDCloud Share** you can share your files on multiple computers (e.g. your Laptop and Desktop). The files are synchronized automatically and backed up automatically too.

With **CHDCloud TeamShare** you can manage, share and access files on multiple computers and with other users. You can also easily restrict access to specific folders too.

It's really easy to use. If you're using CHDCloud Backup then you don't need to do anything – it just does it for you. If you're using **Share** or **TeamShare** you just access your files in the same way that you use My Documents.

Access your shared files via PC, Laptop, Web, iPhone or iPad

| | Backup | Share | TeamShare |
|------------------------|--------|-------|-----------|
| Backup | ✓ | ✓ | ✓ |
| Unlimited backup space | ✓ | ✓ | ✓ |
| Share on multiple PC's | | ✓ | ✓ |
| 500GB of Shared Space | | ✓ | ✓ |
| Restrict access | | | ✓ |
| Share with other users | | | ✓ |
| 1TB of Shared Space | | | ✓ |

Backs up files as you work

Restrict access to certain folders

No hidden costs

Examples

Instead of purchasing a new server and using complicated VPN connections or risk using free solutions like Dropbox or Google we have several customers successfully running their business using **CHDCloud TeamShare**

Save money on backup tapes and disks as all your data is automatically backed up.

Use **CHDCloud TeamShare** for projects or just for certain types of files.

Work from anywhere. There's no need to have a central office or server.
